

Michelle "Mickey" Moran was in Goodsprings one time before she was born but didn't wait for the return trip before arriving in southern California in 1938 although her roots and lifetime are mostly in Nevada.

The fifth and sixth grade teaching from Ed Fleming at the Goodsprings School carried her through the eight grade in Las Vegas then on to attend high school in Yerington Nevada.

With a B.S in Chemistry from UNR in 1959 and M.S from U of Arizona in 1962, DuPont in Wilmington Delaware looked quite challenging. Returning to U of A as Research Associate in 1966, she later returned to Goodsprings and worked at Unocal MolyCorp at Mountain Pass, CA as Laboratory Supervisor.

Chemistry involved working with computers of which she became proficient in both repairs and operations, leading to a new hobby. Retired now, some of her time is spent working with GHS members as Treasurer and maintaining the website.
